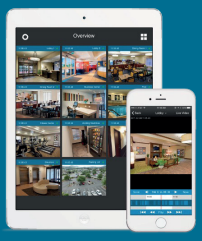
Capture by ADI Cloud Solutions VSaaS

What is the Capture by ADI Cloud Solutions VSaaS?

The Capture by ADI Cloud Solutions VSaaS is a fully managed cloud video surveillance solution, delivering an end-to-end video management system that's simple to deploy and easy to use. It supports all modern browsers and works on Windows, Mac, even Linux with no plugins to install.

FULLY MOBILE

View video anytime, anywhere. The fully functional iOS and Android applications provide complete access to live and recorded video and can also be used to install, configure and manage the system.



GOT CLOUD?

Capture by ADI Cloud provides a cloud based, video management system. The CMVR is installed onsite, connects to your cameras, records video locally, and then securely synchronizes both video and meta data to the Capture by ADI Cloud Data centre. It's a robust, secure appliance specifically designed to overcome the demands of transmitting high-resolution video through the Internet.

COMPREHENSIVE CAMERA SUPPORT

We believe camera compatibility is important. There's no need to be locked into a single camera vendor. Businesses need the flexibility to work with the cameras that they choose. Bridges and CMVRs support ONVIF Profile S IP cameras. Combo Bridges and CMVRs support IP as well as NTSC and PAL analogue cameras. For an up to date list of all compatible cameras visit www.een.com/cameras.

WORRY FREE MANAGEMENT

All of the software in the Capture by ADI Cloud and firmware on the Bridge is managed and updated by Eagle Eye Networks.

SECURITY SIMPLIFIED

With Eagle Eye Complete Privacy Encryption™, video is fully encrypted during transmission and at rest. The Bridge has no open ports to the Internet, eliminating security vulnerabilities commonly found in other systems and requiring no router or firewall adjustments.

Compact CMVR

224+ / 225 / 324+ / 325

The Eagle Eye Cloud Managed Video Recorder (CMVR) stores video and acts as a gateway from your premises to the Eagle Eye Cloud Data Centre where your video can also be stored and managed by the Eagle Eye Cloud VSaaS. It provides video storage, video buffering, a secure connection, bandwidth management, and monitoring of cameras.

These small form factor CMVRs are suitable for applications up to 8 cameras at 4 MP when a server rack is not available. They are suitable for wall or shelf mounting. The CMVR 225/325 is a hard wearing, all aluminum version with a broader industrial temperature range and includes 4 POE ports for direct camera connection. It is sometimes utilised in vehicle applications.

RECORDING FEATURES

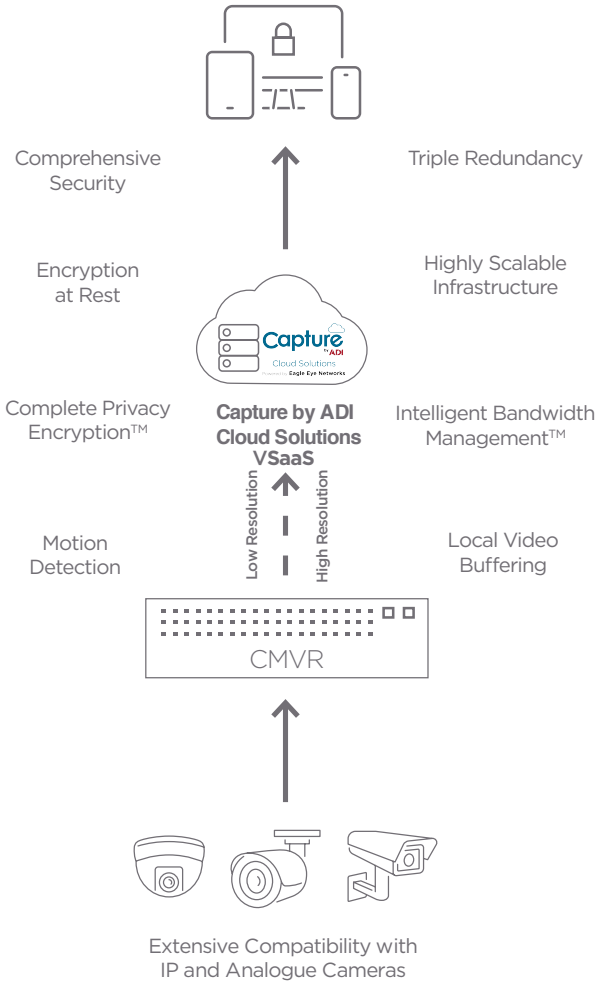
- Video encrypted in transit and at rest
- Fully cloud managed
- Intelligent Bandwidth Management with local buffering
- Motion or continuous recording
- Optional audio recording

WEB INTERFACE & MOBILE FEATURES

- Native iOS and Android apps
- View live and recorded video
- Compatible with all modern browsers
- Motion detection with alerts
- Map and floorplan display

SYSTEM ADMINISTRATION

- 100% browser-based; no software
- Granular user permissions
- Multi-site support
- Point and click video sharing
- Centralised management



NETWORK FEATURES

- Automatic network configuration
- Secure camera network (dual network ports)
- No inbound connections needed
- Packet loss detection/reporting
- Network disconnected alerts

MANAGEMENT FEATURES

- Remote management
- Automatic camera discovery
- Automatic camera configuration
- Advanced motion detection
- Local video buffering
- Configuration synced to Cloud
- Camera trouble alerts
- Internet outage alerts
- Fully cloud managed

STANDARD SUPPORT

- Free of charge with an active subscription
Warranty – 2 years
- 24/7 email and web support
- 8 a.m. to 6 p.m. phone support
