ACCESSORIES/ RTE-85 Series - All Active Switch

Product description

Our range of "All Active" exit switches have a brushed stainless steel faceplate and are supplied as flush or surface. These switches fit on a standard UK back box.

"All Active" means the complete surface area of the face will activate the switch. This is ideal for those who have difficulty targeting a smaller button and is particularly suited for DDA compliance and general high traffic areas.

All models include a heavy-duty micro switch with a common, normally open & normally closed contact. The switches are suitable for accepting the option of a universal radio transmitter, becoming a wireless device and will fit straight onto our RPSS-CUT stainless steel post.

RTE-85DL

RTE-85E

Key features

- High quality stainless steel
- Large all-active target area
- UK back-box format
- Surface or flush
- High impact and high traffic use
